Please replace the paragraph on page 1, line 23 to page 2, line 6 with the following paragraph:

For example, wet wipes have been traditionally dispensed in sheet form from a tub like container with a hinged lid on the top. The lid is opened and individual or singularized sheets of the wipes are removed. Another type of container that has been used for wet wipes provides a roll of wipes in which the wipes are pulled from the top of the container in a direction that is parallel to the axis of the roll. These wipes are pulled from the center of a hollow coreless roll that has perforated sheets. These containers generally have a snap top lid that is opened to expose a piece of the wipes that can then be pulled to remove the desired amount of wipes. Once pulled out the wipes can then be torn off, usually at a perforation, and the lid closed. Embodiments of dispensers are described in ~~co-pending U.S. Patent Application Serial No. application serial number~~ 09/659,307, now U.S. Patent No. 6,827,309, ~~having lawyer docket number~~
